

Dear partners!

"Turbulentnost'-DON" is the group of companies which has existed since 1997. It is located in Rostov-on-Don city, Russian Federation.

Nowadays we have the following achievements.

1. The working team of more than 400 people.
2. The production area is about 10,000 square meters.
3. More than 50 representative offices in Russia and abroad.
4. The operating system of quality control management, that's called ISO 9001 (the international certificate of IQNet).
5. Our company produces about 200 kinds of products.
6. Own department of technological developments with the investing new products at the rate of 2 to 3 million dollars annually.

We develop, manufacture and offer to supply innovative equipment for the following purposes.

1. Industrial, commercial, technological metering of gas, including heavily contaminated gas.
2. Household gas metering.
3. Commercial and industrial metering of liquids.
4. Consumer commercial account of liquids.
5. Verification of domestic gas meters.
6. Verification of industrial metering of liquids.
7. Automated system of collecting data from various meters (telemetry).
8. Determining the level of liquid media.
9. Production of thermal energy (modular boiler).

We participate in the international Expo forums. Also we make presentations and workshops. Our company is ready to provide any additional information about our products on the first request of customers. We are going to train professionals in any convenient form for the partners.

It is easy to work with us. Our products are unique and competitive.

We are searching for buyers interested in purchasing our products. Also we invite interested companies to cooperate with us in organization of representative offices in different regions of the world.

Sincerely,

Igor Dolya

Director of "Turbulentnost'-DON"
